👤 Professional Summary

IT Consultant with 4+ years delivering enterprise infrastructure projects (monitoring, IAM, automation) for clients including Volvo, Telefónica and the Spanish Ministry of Defence. Hands-on experience with incident response, PKI, SIEM concepts and network security. Google Cybersecurity Certified; CompTIA Security+ in progress. Seeking SOC / Security Operations / Cybersecurity Analyst roles.

⚙️ Technical Skills

Cybersecurity: SIEM · Incident Response · PKI · Vulnerability Mgmt
IAM: Ping Identity · CA SiteMinder · Entra ID · SAML/SSO
Monitoring: DX NetOps · DX Spectrum · SNMP
Systems: Linux (RHEL) · Windows Server

Automation: Bash · REST APIs · Python (basics)
Cloud: Azure · AWS IAM
Security Tools: Wireshark · Nmap · Splunk (basics) · OpenVAS
Other: Docker · Tailscale · SQL · Git

📁 Professional Experience

Smart Technologies

IT Consultant

Apr 2022 – Aug 2026

Ministry of Defence, Spain Defense

Jul 2025 – May 2026

- Stabilised and upgraded DX NetOps (Spectrum, Performance Center, NFA) for 1,200+ SNMP devices across a fault-tolerant topology; authored runbooks adopted by client administrators.
- Managed platform PKI (OpenSSL CSRs, keytool keystores) and HTTPS/SSO configuration; performed MySQL (ddmdb) maintenance and event purging.

Volvo Group Automotive

Jun 2022 – Oct 2023

- Migrated 50+ enterprise applications across multiple Volvo Group brands from CA SiteMinder to Ping Identity (PingFederate/PingAccess), mapping AD groups and httpd.conf redirects to SAML/OIDC adapters.
- Validated SSO flows per application with dedicated test accounts; triaged legacy edge cases and escalated when needed; zero customer complaints across the entire migration.

Telefónica Spain Telecom

Oct 2023 – May 2024

- Executed SiteMinder upgrade across QA/pre-prod/prod, resolving a Java 8→11 environment blocker.
- Built a 9–10 script Bash suite + orchestrator extracting the full policy store via REST API into CSV for BI analysis — weeks of manual work reduced to a 10-minute run.

Broadcom / Aspire Monitoring

Sep 2023 – Nov 2023

- SME for DX Spectrum; built a Juniper event-correlation catalogue (cause/effect mapping, alarm set/clear rules) covering 36+ interdependent events.
- Documented alarm propagation patterns and auto-recovery triggers, enabling faster L1 triage and reducing false-positive escalations to senior teams.

Client NGO (FIBE) NGO

Feb 2025 – Aug 2025

- Led response to 3 security incidents on a compromised WordPress site (phishing-driven account takeover): terminated sessions, rotated credentials, removed injected code, monitored logs; recommended KeePass + awareness and escalated to specialists.
- Administered O365 IAM with least-privilege roles; resolved 40+ Jira tickets; authored documentation that eliminated recurring requests (8 tickets → 0).

TULAlabs R&D

C# Intern

Aug 2020 – Oct 2020

- Developed a full-stack C# application for real-time industrial monitoring; designed SQL database schema and responsive web UI.
- Worked in an agile team with Git workflow and peer code reviews; contributed to internal documentation and testing practices.

Various Professional Roles

Temporary

2020 – 2022 — Roles held while transitioning into IT.

🔧 Technical Projects

Homelab – Mac Mini M4

- Continuously running homelab, 20+ containerized services over Tailscale (WireGuard) with zero exposed ports; containers hardened to non-root.
- Monitoring (Uptime Kuma, Netdata), log aggregation and vulnerability scanning with OpenVAS; Bash automation.

🎓 Certifications, Education & Languages

Certifications

Google Cybersecurity (2026)
CompTIA Security+ (in progress)
Azure Fundamentals AZ-900 (2023)
IAM Training: Keycloak · FreeRADIUS · CyberArk (2024)
